

Move-it™

automated loader and stacker

Automated digital sheet and board handling system for Zünd G3 cutting tables.

- Supports new productive “tandem modus” on dual zone vacuum plate.
- Truly operator-free digital production.
- Ensures 100% production time on cutter – no time wasted on material handling.
- Loads and unloads a work zone while producing in the other zone – and vice versa.
- Compatible with all Zünd G3 tables, modules and tools.
- Compatible with Zünd G3 conveyor roll feed systems – no interruption with unwind system and full access to roll-off and roll-up devices.
- Immediate cutting of series from a few sheets till overnight 24/7 productions.
- Most flexible sheet and board lifting system with user configurable suction cup placements.
- Optional vacuum plates available on request.
- Complies with machine safety standards for emergency-stop and operator interventions.
- Fully integrated with Prepare-it, Nest-it and Cut-it Vision workflow software.
- Get status messages from Move-it™ via mail and SMS.
- Loads directly from a pallet, table or from optional loading platform.
- Finished products are stacked exact and direct to a pallet.
- No setup time, Move-it™ produces directly from “file-open” dialog.
- Easy selection of single zone or dual zone production – depending on sheet/board size.
