

DRAWTO

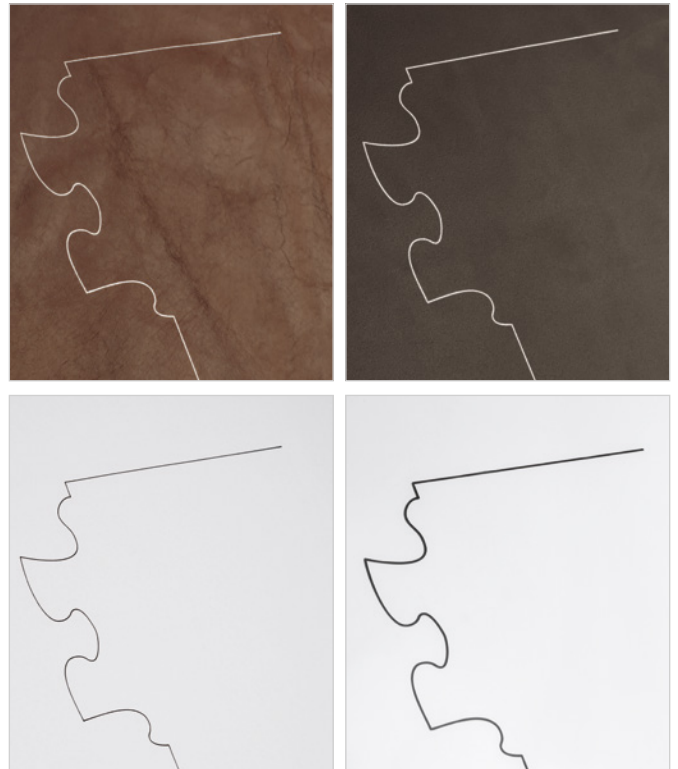

Drawing Tool

DRAWTO is a cost-effective tool for precise marking and drawing on textiles, leather, rubber or Teflon.

An extremely wide range of materials can be easily marked up using this drawing tool. DRAWTO is a very economical tool as it uses readily available drawing tools such as ball-point or felt-tip pens in various line widths.

It is mainly used to produce patterns in the textile and leather industries. Assembly marks, dashed lines and text can all be drawn with this tool. DRAWTO is not intended for marking up finished products.
